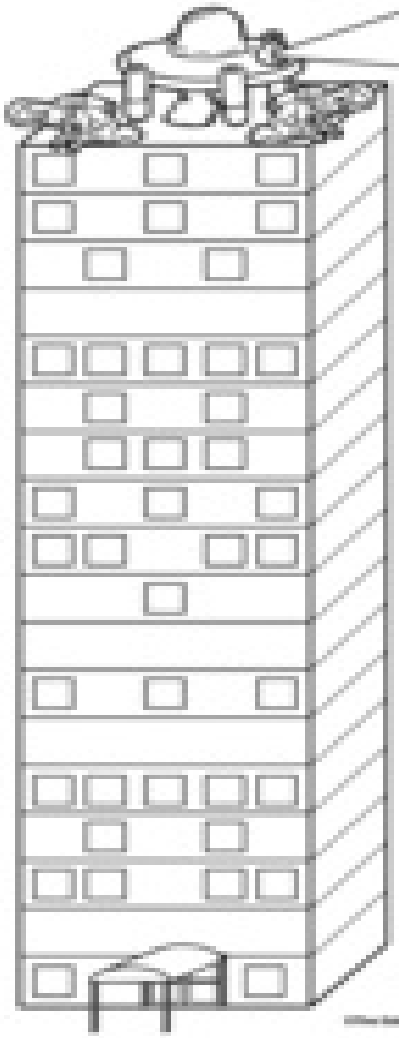
Math Review
Ordinal and cardinal numbers

Lucky Landing!

Study the building.
Then use cardinal or ordinal numbers to answer each question.

Remember!
Cardinal numbers tell how many, such as 1, 2, or 3.
Ordinal numbers show position in order, such as 1st, 2nd, or 3rd.



1. If the bottom floor is the 1st floor, what is the top floor? _____
2. How many floors have exactly 4 windows? _____
3. Which floors have 5 windows? _____ and _____
4. How many floors are between the 4th and 11th floors? _____
5. How many floors are between the 6th and 15th floors? _____
