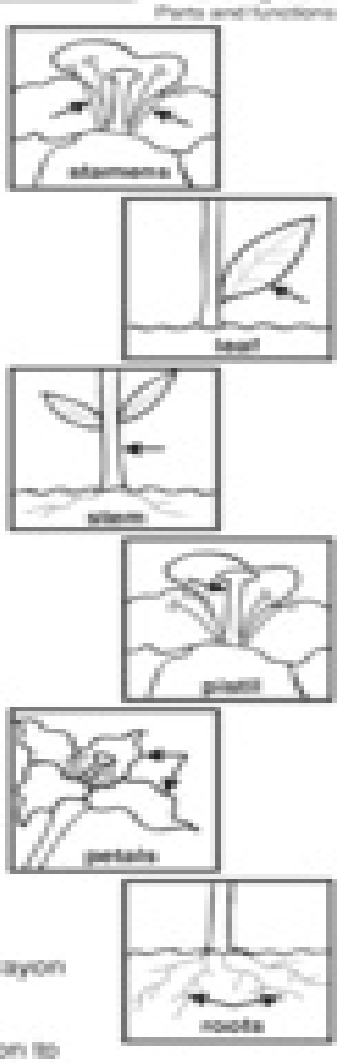
Name _____

Take Note!

Read. Study the pictures.
Fill in the blanks.

1. The _____ holds up the flower. It takes water from the roots to the leaves.
2. A green _____ grows from the stem. It helps make food for the plant.
3. The _____ hold the flower in the ground.
4. The _____ is in the middle of the flower. Seeds grow inside it.
5. The _____ make pollen. They are thin like thread.
6. The _____ are bright colors. They attract some insects and birds.



Now follow the directions below.

- Find the plant part that has seeds inside. Use a green crayon to trace the box.
- Find the plant parts that make pollen. Use a yellow crayon to trace the box.
