Name: _____

Simplify the Improper Fractions.

Simplify the improper fractions which involves reducing fractions to their lowest terms. First you will need to know what the largest common factors are for the denominator and numerator.

1. $\frac{44}{24} =$

2. $\frac{18}{15} =$

3. $\frac{32}{20} =$

4. $\frac{42}{18} =$

5. $\frac{78}{30} =$

6. $\frac{45}{20} =$

7. $\frac{42}{24} =$

8. $\frac{22}{12} =$

9. $\frac{96}{36} =$

10. $\frac{28}{16} =$

11. $\frac{40}{15} =$

12. $\frac{33}{12} =$
