TH Dots Game

Find a partner to play with. You will each take turns choosing a word and, using your best sounds ____ say it 3 times OR ____ say it in a sentence.

When you have said your word/sentence correctly, you may draw a line between the two dots at the end of your word. Then, have your partner take a turn. The person that completes the 4th side of a square may write their name in the square and take another turn. The person with the most squares at the end of the game wins.
