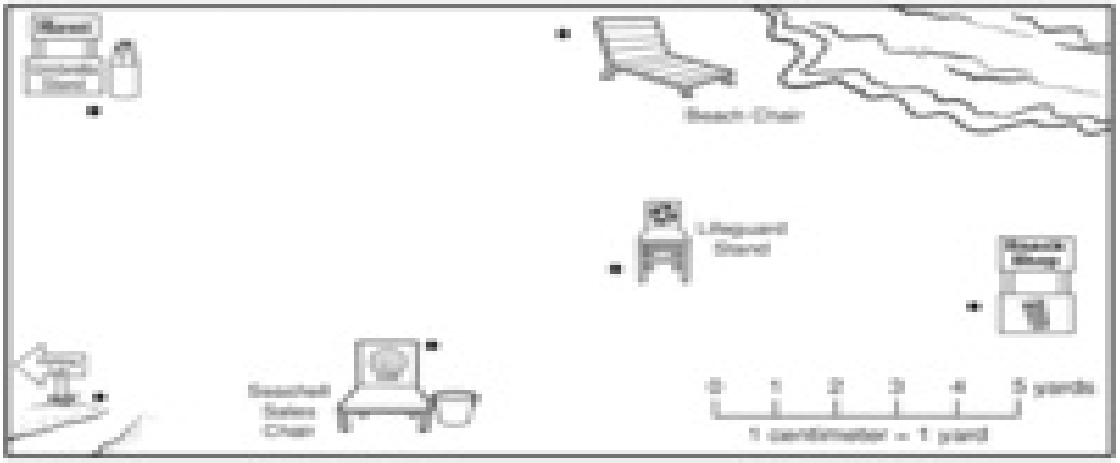
Name _____ Summer Map scale

A Beach Day

Use a centimeter ruler and the map scale to find the distance between each pair of places.

(Hint: Measure to the closest centimeter.)

1. the parking lot path and the beach chair _____ yards
2. the snack shop and the seashell sales chair _____ yards
3. the umbrella stand and the beach chair _____ yards
4. the lifeguard stand and the snack shop _____ yards
5. the beach chair and the lifeguard stand _____ yards
6. the parking lot path and the umbrella stand _____ yards
7. the snack shop and the beach chair _____ yards
8. the umbrella stand and the snack shop _____ yards
9. the lifeguard stand and the parking lot path _____ yards
10. the seashell sales chair and the beach chair _____ yards



Bonus Box: Sarah crawls from the beach chair to the snack shop. Then she crawls to the umbrella stand. Scott crawls from the parking lot path to the lifeguard stand. Then crawls to the snack shop. Who crawls farther? _____
