Arriving Late To Class

Arriving late to class can be stressful as you quietly attempt to slip unnoticed into the room, hoping to avoid the gaze of your teacher and classmates. Unfortunately, sometimes you don't have a choice but to be late, so it's important to make the best of the situation.

The Story of John and Mr. Gallard

John was a typical student in Mr. Gallard's class. He got along well with his classmates and was liked by most of his teachers. John was known for often arriving late to class, and this was a habit that Mr. Gallard was not fond of. John was aware of this and was determined to change his ways. He was tired of being reprimanded and wanted to be a model student. John was also aware that his grades were suffering because of his tardiness and he was determined to change this.

One morning, John was late for class again. As he walked down the hallway, he was nervous about what he would say to Mr. Gallard when he finally arrived at the classroom. John was aware that he was late and was hoping to avoid any confrontation with his teacher. He was also hoping that he would not be asked to stand in front of the class.
