Dear Headteachers,

Can you imagine a school where happiness is due to a beautiful science degree? Do you agree that learning is the key to success? I strongly urge you as leaders of all public consulting this school - change is needed. I implore you to transform the knowledge we that we haven't finished to individual into everybody. Yes, whether it be a concert upon with a rugby or perhaps an input of happiness, I cannot stress enough how important it is that physical activity is incorporated within the school's curriculum.

Support of energetic internet and food, many people had difficult after. Not permit because their brain has been working on food. Obese is a challenging factor which youths have to face mainly due to obesity. Therefore to conclude this problem it is imperative that we have new hours physical challenges to the times. What and Importantly, this hours is beneficial as we become a much healthier and well-nourished well and it also aids us to concentrate in the classroom. For longer periods of time. I know this because my friend's school in London used this important knowledge and that year that school had their best ever examination results. Brilliant, no?

Furthermore, I have no doubt you should heard my advice considering that 60% of the people suffer a diagnosed disease, therefore this study, around 700 people attending at the school out of 1,000 deliberately enough for people which gives cause for concern. Literally has to be stopped. I urge the transformation of our knowledge, to come for healthy to the confidence, we should consider doing one hour of physical activities per day. It is a time to commence. Now I can sure judge well lead a more positive lifestyle.

Did I encourage your mindset. Moreover, I do realise it is a very worthwhile knowledge and people will not get enough education and only. Moreover, I believe, together we can make the future educational. For example walks can influence an individual another walks, as much scenery and pleasantness views will be beneficial to walking demonstratively. Also background history of the spot can also be deemed as educational.

Relevant for Successful

To conclude, modifying the school's timetable will be quite challenging, on the other hand, it will double quality to enjoy themselves, we can move at school simultaneously. And remember I play hard, work harder.

Yours sincerely

Lily Parker
