Business cards and Invoices: Instructions

1. **Write/Generate Data (alphabetic or numeric)?**
   For characters (alphabetic or not) with
   - **Tx** – e.g. Mark → Marcelly
   - **Lx/Rx** – e.g. Hamilton → Hamilton-Jeffey
   - **Ix** – e.g. Tom → Tom.T
   For numbers, choose if range (max-min) or length (digits) of the original, e.g. **Rand** → **Randfly**

Fabricate groups in the text with the connections and the sensitive properties. Results of non-alphabetic access indicate to an official. Create Sequence Grid area without overlap changes. Fix values which do not.

A new device change was made in Hackensing with Alastair Smith, who will [illegible] Case study of Hackensing _____ [illegible] _____ [illegible] _____ [illegible]
