

Math and Manipulatives (Science)

Sort farm animals (wooden, plastic or pictures) by type:

by what they produce for people - "eggs" or "meat" or "neither":

Animal Hide

Hide plastic or wooden farm animals around the classroom. Tell the children that they are going to look for farm animals. Have the children look around the room, and when they find an animal, they can tell you where they found it. Keep a written record of their findings (Joe found the cow "inside" the sand table.) Then, they tell you one thing that we get or make from that type of farm animal. Record their answers. For example: "We get milk from cows."
