

## PZP Immuno-Contraception Update!

There have been various changing circumstances blocking PZP going back and forth between the state of NM and the Humane Society of the United States (HSUS) however the HSUS has finally registered PZP properly in this state. It is now down to our three government agencies only. Please again ask our Governor to intervene.

Please call Susanna Martinez Call 505-476-2200 or email [gloria.marquez@state.nm.us](mailto:gloria.marquez@state.nm.us)

**Very Special Thanks to:** Gordon Environmental Inc. support for Windmills for Wildlife Project & Kevin Quail for ongoing Wild Horse & Wildlife habitat support and stewardship!

### Current STATE Park Proposal by Marty Clifton

WHOA's input/info on the plan to convert the BLM lands in Placitas to a State Park under the Public Parks and Purposes Act (RPP&P).

1. Needs the Governor, State Parks, and the BLM to agree that the horses can stay on (as wild or livestock). (Marty Clifton is now working this.)
2. The previous Governor and State Park Dept. signed on with WHOA's attempt at this to allow the horses to stay as wild life, however the BLM denied their approval. The BLM stated that there could be no grazing under RPP&P.
3. If and when the land becomes state lands, the WHOA court case would be moot and the horses would lose the opportunity to be declared legally wild along with the commensurate protections.
4. WHOA does not disagree with the request to move horses to the BLM lands, fence and feed.

### Timing

The WHOA court case and the State park plan proposed will take time. Our government needs to allow for population management to occur in the meantime and proactively, meaning contraception is necessary.
