

Adding Integers (A)

Use an integer strategy to find each answer.

$$(-35) + (-34) =$$

$$98 + 31 =$$

$$(-14) + (-84) =$$

$$27 + (-87) =$$

$$(-45) + (-70) =$$

$$15 + (-25) =$$

$$\begin{array}{llll} 1) - (-1) = & (-5) - (-5) = & (+2) - (-4) = & (- \\ 5) - (+1) = & (+9) - (-6) = & (+6) - (-2) = & (- \\ 3) - (+6) = & (-4) - (-5) = & (0) - (-1) = & (- \end{array}$$
