

VOLCANO MINI BOOK

Decorate with Crayola® Colored Pencils. Cut out the book and fold along the dotted lines. Staple shut.

<p>Magma Chamber</p> <p>Land</p> <p>Volcano</p> <p>Magma</p>	<p>Magma Chamber</p> <p>Land</p> <p>Volcano</p>
<p>The volcano erupts when the magma spills out of the volcano. The magma then becomes lava and hardens, which builds the volcano.</p> <p>Volcano</p> <p>Land</p> <p>Magma Chamber</p> <p>Magma</p>	<p>HOW A VOLCANO ERUPTS</p>

When the magma is under a lot of pressure it rises up through the volcano.

A volcano is a large mountain with an opening at the top. Underneath the volcano the ground is a chamber where magma is held. Magma is hot liquid from the earth's center.
