

CLASSIFICATION=TAXONOMY

First System of classification-

- Aristotle
- All living organisms were broken down into two groups- plants and animals
- Bad system because it was not specific enough (too many living organisms)

Present system of classification-

- Linnaeus- a Swedish physician
- Broke down living organisms into Kingdoms
- There are 5 Kingdoms-

Animal- A

Plant-P

Monera-M

Fungi- F

Protista-P

**** Aunt Polly Made Fudge Pudding****

WHO BELONGS WHERE???!!!!!?!!!

Animal- Lion, Wolf, Eagle, Horse, Starfish, Whale, Spider

Plant- Oak tree, corn, apple, grass, rose bush, lettuce

Monera- bacteria, blue-green algae

Fungi- moss, mushrooms, mold

Protista- amoeba, paramecium, algae

There are more groupings in Linnaeus' system. They start with Kingdom.....the largest grouping---->and each group that follows gets smaller and more specific.

KINGDOM, PHYLUM, CLASS, ORDER, FAMILY, GENUS, SPECIES.
