

Minute Math Mastery

There are 21 total addition assessments in this packet, all intended to be completed in one minute. Students are expected to reach 100% accuracy in one minute in order to move on to the next level. Each page has two identical assessments, meant to be cut in half. Each level has 24 questions.

Assessments A-G	facts to the sum of 10
Assessments H-I	facts up to the sum of 15
Assessments J-R	facts up to the sums of 18-20
Assessment S	double fact sums up to 20
Assessments T-U	mixed fact sums up to 20

Along with the timed assessments, I have included a skills tracking chart so you can easily document student progress through the levels.

I hope you find this kit helpful! Please let me know if you have any questions, concerns or comments. I appreciate your feedback!
