

Section 1: Evidence of life

Figure 1 Shows the results of three experiments designed to detect life on Mars.

Figure 1

1. The three experiments were conducted as follows:
- 1.0.1. The first experiment was designed to detect the presence of water on Mars. The results of this experiment are shown in Figure 1.0.1.1. The experiment was designed to detect the presence of water on Mars. The results of this experiment are shown in Figure 1.0.1.1. The experiment was designed to detect the presence of water on Mars. The results of this experiment are shown in Figure 1.0.1.1.
 - 1.0.2. The second experiment was designed to detect the presence of organic molecules on Mars. The results of this experiment are shown in Figure 1.0.2.1. The experiment was designed to detect the presence of organic molecules on Mars. The results of this experiment are shown in Figure 1.0.2.1.
 - 1.0.3. The third experiment was designed to detect the presence of microorganisms on Mars. The results of this experiment are shown in Figure 1.0.3.1. The experiment was designed to detect the presence of microorganisms on Mars. The results of this experiment are shown in Figure 1.0.3.1.

Table 1: Results of the three experiments

1.0.1.1	Presence of water detected	Yes
1.0.1.2	Absence of water detected	No
1.0.2.1	Presence of organic molecules detected	Yes
1.0.2.2	Absence of organic molecules detected	No
1.0.3.1	Presence of microorganisms detected	Yes
1.0.3.2	Absence of microorganisms detected	No
1.0.4.1	Presence of water detected	Yes
1.0.4.2	Absence of water detected	No
1.0.5.1	Presence of organic molecules detected	Yes
1.0.5.2	Absence of organic molecules detected	No
1.0.6.1	Presence of microorganisms detected	Yes
1.0.6.2	Absence of microorganisms detected	No
