

Name _____ Date _____

EUKARYOTIC CELL ORGANELLE

Match the organelle to its function.

1. Golgi bodies _____

2. nucleus _____

3. ribosomes _____

4. endoplasmic reticulum _____

5. lysosomes _____

6. chloroplast _____

7. vacuole _____

8. mitochondria _____

9. cell wall _____

a) the "brain" of the cell

b) site of protein production

c) digests worn out cell parts, wastes

d) the powerhouses of the cell

e) protective layer found outside the cell
membrane in plants

f) storage area

g) materials are transported to various
parts of the cell

h) the "packaging and distribution"
center

i) storage of chlorophyll; give green
plants their color
