

How To Draw a Police Dog

Start with straight lines to make the basic body. Just outline it lightly first. He has a strong neck and chest.

The back leg is made of a curving line going back and down, and two lines curving down and back. Four lines make a "L" to finish the back leg. The front leg is almost straight.

Draw the head with short straight lines at first. To outline the shape. The muzzle has a bend in it. The ears are pointed and forward slightly. The forehead could be either high or low. Be careful about the teeth. They can make a good drawing look messy: less is more with teeth.

Go over your drawing with a darker pencil or a marker to make the lines smooth and clean. Erase any extra lines. Give him a collar and a badge.
