

## How To Draw A Valentine

Start by lightly drawing an outline

Use a guideline straight up and down to center things so they stay even. Draw lightly at first.

At the top of the guideline draw two circles that overlap slightly.

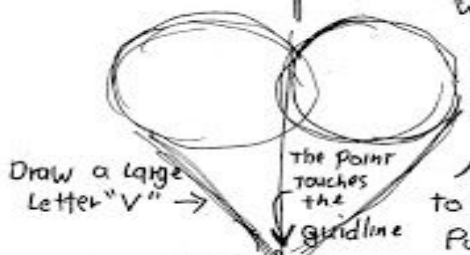

Below the circles draw a large letter "v." it goes from the circles to the guideline.

Start the ribbon by drawing two bent lines parallel to each other.

With a line connect the top and bottom at ends.

Add two double curving lines at the bottom starting at the outside edge, going back in, then down, then out.

Add lines up and down to connect top parts to the bottom parts.

Draw a large Letter "V" →

Put the "M" on the ribbon on the guideline.

Next put the "B" on the left and the "e" on the right - this helps keep the spacing right. Last fill in the rest of the letters to spell out "Be Mine."

Erase the extra pencil marks.

Color it as you want, and give it to someone
