

Multiple Representations Mini-Project

The savings of Ana, Kevin, Adriana, and Eduardo changed during the last year, as described below. The numbers indicate amounts of money (in dollars) at the end of each week.

Ana:

The table shows how much money Ana had saved at the end of each week. The table continues in the same way for the rest of the year.

Week	1	2	3	4	5	6	7	8	9	...
Amount	7	14	21	28	35	42	49	56	63	...

Kevin:

Kevin kept his savings at \$00 throughout the year.

Adriana:

The graph below describes Adriana's savings at the end of each of the first 20 weeks. The graph continues in the same way for the rest of the year.

Eduardo:

Eduardo's savings can be described by the equation $J = 300 - 2w$, where w stands for the number of weeks that have passed and J stands for the amount of savings, in dollars.
