

How To Draw a WWII Sherman tank

The basic shape is like a flat triangle. There are four basic horizontal lines: "1" bottom, "2" lower flank, "3" basic top, "4" turret top. Curve line 3 down to connect with the top of line 2 of the back. The turret curves up on the back half and goes straight up at the very back. There is a dome on top of the turret.

The corner goes a little beyond the front. There are three sets of rollers. Outline them as three triangles pointing down over three wide triangles. The wheels are on each end. There is a spiky drive wheel at the front, and a smooth roller at the back.

There is a gun on top and barrels on the back.

The tread has spikes to dig on track in soft
