

## Be forceful!

### Observations

A push is a *force*. A pull is also a *force*. Forces can make things move. They can also slow things down. Some forces can make things move fast. They can make some things move faster than others.

### Science activity

Samantha is playing with a ball. Color in the pictures where she is making the ball move fast.

kicking

holding

throwing

bouncing

sitting

Which activity makes the ball go the fastest?

\_\_\_\_\_

### Science exploration

Drop marbles from different heights onto flattened clay or playdough. What happens to the clay?
