Originate successful design solutions to fundamental architectural problems by integrating concepts, formal/visual principles and techniques.

Inadequate Developing Adequate Accomplished Mastery

Does not attempt or is unable to complete design solutions.

creative use of concept, limited exploration moderately creative use of concept, of technique and/or application of principles. fundamentally appropriate technique, and $\ \ \, \text{Little effort to challenge creative boundaries} \ \ \, \text{adequate application of principles. Solution}$ resulting in obvious or poorly developed shows some effort to challenge creative

Unsuccessful design solution due to lack of Fundamentally sound design solution with boundaries with limited or uneven success.

Interesting design solution showing consistently creative development of concept, original development of technique innovative application of techniques and and original application of principles. Solution shows ongoing creative inquiry and rigorous creative inquiry and investigation exploration of design potential with largely throughout design process with highly effective results.

Compelling design solution showing highly original creative development of concept, exemplary use of principles . Solution shows successful results.

Demonstrate fundamental understanding and application of architectural formal + spatial principles as they relate to human experience.

Inadequate Developing Adequate Accomplished Mastery Limited understanding of experiental quality Basic functional understanding of experiental Clear understanding of experiental quality Advanced understanding of experiental qualtity of architectural form and space resulting in quality of architectural form and space of architectural form and space resulting in of architectural form and space resulting in Does not attempt or is unable to largely unsuccessful architectural solutions. resulting in fundamentally sound successful architectural solutions. Minor exemplary architectural solutions. Effective use Significant problems with scale, materiality, architectural solutions. Moderate problems problems with scale, materiality, sequence, complete design solutions. of scale, materiality, sequence, circulation, sequence, circulation, enclosure or visual with scale, materiality, sequence, circulation, circulation, enclosure and or visual enclosure and visual perception. perception. enclosure and or visual perception. perception.
