

METRIC CONVERSION CHART

Kilo-	hecto-	deca- (deka-)	<u>ROOT</u> meter (m)	deci-	centi-	milli-
k	h	da (dk)	Liter (L)	d	c	m
1000	100	10	gram (g)	0.1	0.01	0.001

Steps to covert from one unit to another:

1. Write the problem you want to convert.
2. Place an "X" at the unit you are starting at.
3. Put your finger on the unit you want to convert to.
4. Draw an arrow to that direction you want to go to get to your finger.
5. Place a dot to where you need to end.
6. Now, count the number of places you must "jump" to get to the dot.
