

LOGIC

REASONING QUEST

Decide whether the following examples are deductive [D] or inductive [I] reasoning.

Be careful of the wasps, **highlighting**.

Being kind **is** a trait. The platypus **is** a kind. Therefore the platypus **is** a trait.

They were doing it, so I thought it would be **so** to do it all well.

You are not bad, therefore you must be good.

Oxygen and hydrogen are gases at room temperature. Therefore water (H<sub>2</sub>O) is a gas at room temperature.

I've met three non-drivers today and they all were in their aggression. Clearly, non-drivers are all aggressive.
