

Drag Names _____

Part C: Ecosystem

An ecosystem is a community of living and non-living things that work together to sustain it. An example of one such ecosystem is the ocean. A big part of any ecosystem is the food chain and food webs that thrive in the community. Use the words in the word bank to complete the diagram and fill in the missing information.

Certain conditions are required for an ecosystem to thrive. An ecosystem will need _____ and the right _____. All animals in the ecosystem will require _____ in order to survive. Some plants or animals may also require _____ or a _____ to survive.
