

THE GLUE GUN INSTRUCTIONS.

- 1.- The glue gun must be warm before using it. You must wait until it is hot.
2.- The glue gun must be in vertical position.
3.- It's necessary to put paper under the gun because the liquid could spill.
4.- Don't pull the trigger too much because it can break. The problem might be:
 - (a) The gun is not hot yet.
 - (b) The nozzle has to melt again.
5.- Be careful when you take接触 with the glue gun, do it with the hand to get into your body. You must disconnect the gun to indicate before the end-of-day.
6.- Never put different materials inside the glue gun, only the resin bar, otherwise, it would be very dangerous.
7.- Don't touch the top of glue gun because it's very hot, about 300°C
8.- Don't pull the cable, only pull the plug.
9.- Be careful with the cable. Protect the cable from the heat of the cutting tool.
10.- The resin bar must always stay in the gun. Do not take it out.
11.- If you do not intend to use the glue gun, you must disconnect it.
12.- Keep cleaning the area. Otherwise you could have an accident.
13.- Don't use the glue gun in wet areas.
14.- Only use the glue gun, because the resin doesn't work with water or the cable.
15.- Don't use the hot pistol with materials which don't support the high temperature because they can melt.
