

PerformanceAnalytics Charts and Tables Overview

Peter Carl & Brian G. Peterson

September 14, 2010

Abstract

This vignette gives a brief overview of (some of) the graphics and display wrapper functionality contained in **PerformanceAnalytics** including most of the charts and tables. For a more complete overview of the package's functionality and extensibility see the manual pages. We develop the examples using data for six (hypothetical) managers, a peer index, and an asset class index.

Contents

1	Introduction	2
2	Set up PerformanceAnalytics	2
2.1	Install PerformanceAnalytics	2
2.2	Load and review data	3
2.3	Create charts and tables for presentation	5
3	Create Charts and Tables	8
3.1	Create performance charts	8
3.2	Create a monthly returns table	10
3.3	Calculate monthly statistics	10
3.4	Compare distributions	11
3.5	Show relative return and risk	12
3.6	Examine performance consistency	16
3.7	Display relative performance	16
3.8	Measure relative performance to a benchmark	16
3.9	Calculate Downside Risk	21
4	Conclusion	24
