IHI		Patient Safety	IHI white paper – Planning a primary care delivery system	Changes in four key elements of the service delivery system are described in the IHI white paper. The changes include the care team, patient activation, clinical information system, and leadership. IHI identifies the challenges faced in the current system, introduces a new design for the delivery of primary care, and encourages office practices and clinics to move ahead with their own efforts to strive for better patient outcomes.	√	<a href="http://www.premierinc.com/quality-safety/tools-services/safety/safety-share/06-06-downloads/14-planned-care-white-paper-2006.pdf">http://www.premierinc.com/quality-safety/tools-services/safety/safety-share/06-06-downloads/14-planned-care-white-paper-2006.pdf</a>
IHI		Patient Safety	Device Use – Safety Briefing Model	A tool for conducting brief, ad hoc staff meetings focused on sharing observations and concerns about safety hazards related to the use of medical devices and equipment	√	Word;Patient Safety/Medication Systems/Tools; Under: Culture of Safety
