

6.24 READING COMPREHENSION

A. Complete the sentences with ONE word. They can only be taken from the text below.
at least in the context that, to their own satisfaction, as often as the study

Required: your choice of 10-15 words

B. Questions on **My pet, Maudie, was not just my subject!**

COMPREHENSION

190 Considering it was hard for the researchers of this pet-cognition study to distinguish their subjects from all the other dogs around us, those who are increasingly used as research subjects, they decided to use their own pet Maudie as a research subject. Maudie, a 10-year-old dog, was used as a research subject for the study. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. Maudie was used as a research subject for the study. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items.

195 Just because the study researchers believe that young people today are not very well educated and have a poor understanding of the concept of "zero" does not mean that they are not intelligent. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items.

READING COMPREHENSION

200 Some people are using Maudie as a research subject for studying the concept of "zero". The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items.

205 High education, some people may believe that many dogs are very intelligent. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items.

210 The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items. The researchers used Maudie to test their theory that dogs can understand the concept of "zero" and to study the ability to count the number of items.

- 215 B. 1. Find in the text:
1. a dog's program _____
 2. the number of subjects involved in the study _____
 3. how many people had their pet used as a research subject _____
 4. an intelligent individual _____
