

BLANK PERIODIC TABLE OF ELEMENTS
Label each of the families of the periodic table and
color each family a different color

The image shows a blank periodic table grid. The main grid consists of 7 rows and 18 columns. A thick black zig-zag line is drawn across the grid, starting from the top-right corner of the first row, moving left to the second column, then down to the second row, then left to the first column, then down to the third row, then left to the second column, then down to the fourth row, then left to the third column, then down to the fifth row, then left to the fourth column, then down to the sixth row, then left to the fifth column, then down to the seventh row, and finally left to the sixth column. Below the main grid, there is an inset box containing two rows of 14 cells each, connected to the main grid by lines extending from the bottom-left corner of the main grid.
