Navigation elements

You can choose which navigation elements (*top-bar* and *side-bar*) should appear in pages within a specified category.

Choose the category:

```
default
admin
de
deleted
en
es
forum
fr
ga
include
it
nav
nl
pics
pl
```

top-bar: `nav:top`

side-bar: `nav:side-en`

cancel   save changes

NOTE: if the chosen pages do not exist no navigation elemen will be displayed.

BUT if you really want to get rid of the side element you should also choose a proper theme without the side bar. Most of the available themes have such a variant.
