

Educational Computing in Dentistry -- Program Review Checklist

Directions: On the following three worksheets, you will rate your assigned educational program on a number of criteria. Each criterion is fairly self-explanatory. To assist you, numbers in square brackets refer to corresponding sections of the *Guidelines for the Design of Instructional Software* (available at www.temple.edu/dentistry/di/edswstd/), where most criteria are explained in more detail.

If you do not feel comfortable assessing the validity of the program content, please ask a domain expert at your school/institution for assistance.

Please note that you can only enter data in the cells with a heavy border on this rating form.

If you find a question is not applicable (NA) just enter NA or leave it blank. Note: If you are evaluating a *Support Material* entry, skip the Pedagogy and Questions, Answers and Feedback sections (they are marked with NA) as they not applicable.

Important: For each instructional program that you review please save a copy of this spreadsheet with the file name <your initials>_<program #>.xls on your hard disk. At the end of reviewing all programs, please send your individual rating files to Lynn Johnson (lynn-johnson@uiowa.edu).

Please return your reviews by January 31 to Lynn-Johnson@uiowa.edu.

If you have any questions about the rating criteria or process, please contact Lynn Johnson at lynn-johnson@uiowa.edu or (319) 335-7354.
