

The Student Workbook

The student workbook that will accompany the textbook bridges the gap between the textbook and end-of-chapter homework problems by providing students with an environment in which to learn and practice skills separately, much as a musician practices technique separately from performance pieces.

The workbook exercises are linked to each section in the textbook chapters and focus on developing specific skills (interpreting graphs, drawing free-body diagrams, etc.) The exercises are generally graphical, conceptual, or qualitative in nature.

Included in this booklet are the workbook sections linked to Chapters 4 and 5.

There is also a Dynamics Worksheet that can be used in the solutions to the end-of-chapter problems marked . Please photocopy the blank sheet so that you can use it many times.
