

Draw this grid on your paper

above the x  
below the x

between the x and the y

to the right of the x  
to the left of the x

across the top  
across the middle  
across the bottom

in the top  
in the middle  
in the bottom

down the left side  
down the middle  
down the right side

up the left side  
up the middle  
up the right side

### Questions to ask and answer

- Place the number in the correct square. Use the key words to help you.
- (1) Then ask your partner questions about where the numbers are.
  - Example: Which number is in the top right square?
  - Which number is in the very middle square?
  - Which numbers go across the top row?
  - Which numbers go down the left side?
- (2) Make a new grid. Tell your partner where to put each number.
  - Example: In the top left square, write a 4
  - Below the 4, write a 9
  - To the right of the 9, write a 2.
  - Above the 2, write a 7.
