Nervous Tissue

Answer the following multiple choice questions by placing the letter of the correct response on the line provided.

- _____ 1. Astrocytes are examples of:
 - a. motor neurons
 - b. sensory neurons
 - c. neuroglia
 - d. myelinated cells

- _____ 2. What type of process carries impulses away from the body?
 - a. axon
 - b. bipolar
 - c. unipolar
 - d. dendrite

- _____ 3. A neuron with many dendrites and one axon is termed:
 - a. unipolar
 - b. bipolar
 - c. tripolar
 - d. multipolar

- _____ 4. The part of the cell that carries an AP toward an axon is a(n):
 - a. neurilemma
 - b. axon terminal
 - c. Schwann canal
 - d. axon hillock

- _____ 5. A special sensory neuron that picks up a stimulus and initiates an AP is a(n):
 - a. interneuron
 - b. receptor
 - c. motor neuron
 - d. axon
