Reliable Sources Worksheet

Locate two sources in the University Library on a topic of your choice. Provide the requested information for both sources.

Source 1

Author: Maria Aron
Date: April 2012
Title: Learning Community: An International Journal of Education And Social Development
Publication: Volume 2 Issue 1

Write a 100- to 250-word response to each of the following questions:

Is the source reliable? How do you know?

Yes the source is reliable, because it gives us the information needed for different types of study habits for students. It tells about time management something that is very helpful for us. It also gave us a more effective way to use time management. Studying is effective only when you know the time and period to your study life. It shows that there is no difference in the way we study whether we sit at the top or at the bottom of the class. Even though our study habits are not the same all of about about the same information but in very different ways.

Is the information relevant to the topic?

It is very relevant to our topic. It tells us about the different types of personalities for students and studying. Studying is very important part of life because it requires learning and critical thinking. All students don't have the same study habits. Teacher writes have more time to study effectively while top writers don't have the time because of family issues and work. That's why we incorporate time management to set a schedule for all the activities that we have such as work, personal time, family time, and school time. We all have our own unique study habits that are better for our needs but we all proceed.
