

Add from left to right, one column at a time. Then add the partial sums.

EXAMPLE $679 + 345 = ?$

$$\begin{array}{r} 679 \\ +345 \\ \hline 600 + 300 \Psi \quad 900 \\ 70 + 40 \Psi \quad 110 \\ 9 + 5 \Psi \quad \underline{14} \end{array}$$

Add the partial sums.

$$900 + 110 + 14 \Psi \quad 1024$$

$$\mathbf{679 + 345 = 1,024}$$
