

## Counting Atoms Worksheet - KEY - Explanation

---

1) NaOH

- Na is 1 because that is the subscript.
- O is 1 because that is the subscript
- H is 1 because that is the subscript.
- there are three total because of  $1 + 1 + 1 = 3$

2) MgCl<sub>2</sub>

- Mg is 1 because that is the subscript
- Cl is 2 because that is the subscript
- there are 3 total because of  $1 + 2 = 3$

3) Li<sub>2</sub>SO<sub>4</sub>

- Li is 2 because that is the subscript
- S is 1 because that is the subscript
- O is 4 because that is the subscript
- There is a total of 7 because  $2 + 1 + 4 = 7$

4) NaC<sub>2</sub>H<sub>3</sub>O<sub>2</sub>

- Na is 1 because that is the subscript
- C is 2 because that is the subscript
- H is 3 because that is the subscript
- O is 2 because that is the subscript
- There is a total of 8 because  $1 + 2 + 3 + 2 = 8$

5) NH<sub>4</sub>Cl

- N is 1 because that is the subscript
- H is 4 because that is the subscript
- Cl is 1 because that is the subscript
- There is a total of 6 because of  $1 + 4 + 1 = 6$ .
