

1. Multiply the two polynomials and write your answer in standard form.

$$-3x \cdot (4x - 2)$$

$$-12x^2 + 6x$$

2. Multiply the two polynomials and write your answer in standard form.

$$(2t - 3)(t^2 - 4t - 5)$$

$$2t^3 - 8t^2 - 10t + 15$$
