

Name _____ Date _____

USING TOPOGRAPHICAL MAPS

Topographical maps are like regular maps in that they give the geographical positions, but they also give elevations of both manmade and natural features. Using the contour lines and contour intervals, provide a range for the elevations of the features on this map.

Location A: between _____ and _____

Location B: between _____ and _____

Location C: between _____ and _____

Location D: between _____ and _____

Location E: between _____ and _____

Location F: between _____ and _____
