

THREE IN A ROW

"Next to the Marble Maze, this is my favorite game. It's called 3 Meteorites in a Row. Find your best cadet friend to play with you."

The object of the game is to move your meteorites in the square so that you get three meteorites in a row. Each player needs three game pieces. Cut out the meteorites below or use buttons or coins. To start the game, players put their three meteorite pieces on any of the outside dots (•). A player chooses one meteorite to move each turn. Meteorites can be moved to any open • on the board. The first player to get his or her three meteorites in a row, either horizontally, vertically, or diagonally, wins.
