

Adding pairs that make 100 - revision

What number do you need to add to each of these numbers to make the total 100 ?

1. 69
2. 11
3. 34
4. 10
5. 74
6. 68
7. 57
8. 82
9. 17
10. 32

Remember, it is probably easier to count on than take away with these types of sums done in your head.

69 and 1 make 70.

70 to 100 is 30.

Double each of these numbers:

- | | |
|--------------|--------------|
| 11. 35 | 16. 49 |
| 12. 46 | 17. 35 |
| 13. 33 | 18. 47 |
| 14. 29 | 19. 26 |
| 15. 28 | 20. 38 |

If I start from one and keep doubling I soon end up with an amazing number!

Name: _____
