## Producers, Consumers, and Decomposers

Identify which animals are producers, consumers, or decomposers.

Write producer, consumer, or decomposer for each animal.

**Producers** – living things that make their own food from sun, water and soil. Green plants are producers.

**Consumers** – a living thing that cannot make its own food. All animals are consumers, and they get their energy by eating food.

**Decomposers** – a living thing that gets its energy by breaking down dead plants and animals. The most common decomposers are fungi and bacteria.
