

Moon-Earth-Observer Eclipse Configurations

3. This diagram (not to scale) shows side views of different locations of the moon [M1-M2-M3-M4], as seen from different observers on Earth [day 1-day 2-day 3-night 1-night 2]. The sun is located to the left, far off of the page.

Match the views below with the observer location on Earth [day 1-day 2-day 3-night 1-night 2], along with the location of the moon [M1-M2-M3-M4].

Observer:	<u> [night 1] </u>	_____	_____	_____	_____
Moon:	<u> [M1] </u>	_____	_____	_____	_____
