

Name: _____ Date: _____

Brain Teaser

Choose the correct answer.

Is there a 4th of July in England?

How can you cut a cake into exactly 8 pieces by making only 3 cuts?

How many months of the year have 28 days in them?

If you put a bead in an empty jar and screw the top on the jar, how can you get the bead back out without breaking the jar?

Why are manhole covers round and not square?

Yes, there is a 4th day of the month every July.

A square manhole cover can fall into the hole at a diagonal; a round manhole cover cannot fall into the hole

Unscrew the lid of the jar and shake the bead out.

All of them

Use the first two cuts to make an X across the top of the cake. This creates 4 pieces. Make the third cut horizontal, dividing each of the four pieces in half.
