Visual Motor Integration and Written Expression Difficulties

- Allow for spelling errors. Grading should focus on content rather than mechanics.
- Allow student to write in whatever style is most comfortable for them (i.e. print instead of cursive).
- Set realistic and mutually agreed upon expectations for neatness.
- Let student type, record, or give answers orally instead of writing.
- Avoid pressures of speed and accuracy.
- Provide copies of notes.
- Reduce the amount of copying from text and board.
- Accept key word responses instead of complete sentences.

Visual Processing Difficulties

- Highlight information to be learned.
 - Keep written assignments and workspace free from extraneous and/or irrelevant distracters.
 - Provide clear and well-defined worksheets.
 - Go over visual task with student and make sure student has a clear understanding of all parts of the assignment from the beginning.
 - Avoid having student copy from the board or overhead.
 - Have student verbalize instructions before beginning task.
 - To minimize frustrations, avoid crowded, cluttered worksheets.
- Provide sufficient room for student to write answers. ¶
