

## WRITING NET IONIC EQUATIONS

Write balanced net ionic equations for reactions that occur in each of the following cases. (However, insoluble reactants are omitted in the forms of aqueous solutions. Insoluble precipitates that are formed) are written as insoluble solid structures. If no reaction occurs, then write "NO REACTION" and the reaction is balanced.

1. potassium phosphate + magnesium nitrate  $\rightarrow$

1. calcium chloride + aluminum nitrate  $\rightarrow$

1. sodium hydroxide + sulfuric acid  $\rightarrow$

1. calcium + zinc sulfide  $\rightarrow$

1. zinc nitrate + sulfuric acid  $\rightarrow$

1. zinc  $\rightarrow$

1. zinc nitrate  $\rightarrow$

1. calcium carbonate + sulfuric acid  $\rightarrow$

1. zinc nitrate + sulfuric acid  $\rightarrow$
