

Name:

Date:

Animal Cell Organelles

Organelle (small structures)	Function	Other Information
Cell membrane	Structure & Support	The outer covering of the cell Lets things in and out of the cell
Nucleus	Directs all cell activities & reproduction Control center of the cell	Carries information for reproduction
Cytoplasm	Surround all parts of the cell inside the cell membrane Contains all cell organelles	A gel-like substance
Mitochondria	Provides (makes) energy for the cell	Performs cell respiration - using oxygen to make energy
Vacuoles	Stores materials	Stores waste products
