**Q: Animal and plants**  
 Both animals and plants are living things.  
 Why are different? Because plants cannot move. They are fixed to the floor. They receive their food from the soil through their roots.  
 On the other hand, animals can move, they do not make their food. They eat plants and other animals to eat.

**Q: Different habitats**  
 A habitat is a place where a plant or an animal lives. There are different habitats.  
 There are cold places and warm places. Living things can also live in water or on land. A frog lives in water.

Live on land

Live in water

**GRADE 1 SCIENCE** A habitat is a place where a plant or an animal lives
