

1) Determine which triangles in the figure are congruent by A.S.A. Write a congruence statement.

2) Given $\angle A \cong \angle N$, $\angle B \cong \angle T$, $\overline{BC} \cong \overline{TE}$
 Prove: $\triangle ABC \cong \triangle NTE$

Decide whether you can use the ASA or SAS Postulate to prove that the triangles below are congruent. If so (S) write the congruence statement and (S) identify the postulate. If not, write not possible.
